The ChatGPT Lawyer Explains Himself

In a cringe-inducing court hearing, a lawyer who relied on A.I. to craft a motion full of made-up case law said he “did not comprehend” that the chat bot could lead him astray.

Share full article

267

Schwartz later said in a June 8 filing that he was “mortified” upon learning about the false cases, and when he used the tool he “did not understand it was not a search engine, but a generative language-processing tool.”

It's GLP Tools !!!

A member of Mata’s law team then revealed he had used ChatGPT to conduct legal research for the court filing that referenced the cases and that the artificial intelligence tool assured him the cases were real.

Steven Schwartz—the lawyer who used ChatGPT and represented Mata before the case moved to a court where he isn’t licensed to practice—signed an affidavit admitting he used the AI chatbot but saying he had no intent to deceive the court and didn’t act in bad faith, arguing that he shouldn’t be sanctioned.

ChatGPT passes law school exams despite 'mediocre' performance

Summary

- Researchers graded the AI program alongside real students on four different law school final exams
- ChatGPT's grades ranged from a B to C-

(Reuters) - ChatGPT cannot yet outscore most law students on exams, new research suggests, but it can eke out a passing grade.

A quartet of law professors at the University of Minnesota used the popular artificial intelligence chatbot to generate answers to exams in four courses last semester, then graded them blindly alongside actual students' tests.

Test Awal.

GPT-4 Passes the Bar Exam: What That Means for Artificial Intelligence Tools in the Legal Profession

April 19, 2023 | By Pablo Arredondo, Q&A with Sharon Driscoll and Monica Schreiber

SUBSCRIBE

CodeX—The Stanford Center for Legal Informatics and the legal technology company Casetext recently announced what they called “a watershed moment.” Research collaborators had deployed GPT-4, the latest generation Large Language Model (LLM), to take—and pass—the Uniform Bar Exam (UBE). GPT-4 didn’t just squeak by. It passed the multiple-choice portion of the exam and both components of the written portion, exceeding not only all prior LLM’s scores, but also the average score of real-life bar exam takers, scoring in the 90th percentile.

GPT 4 Test-

<https://law.stanford.edu/2023/04/19/gpt-4-passes-the-bar-exam-what-that-means-for-artificial-intelligence-tools-in-the-legal-industry/>

Insight from top 5 papers

The law plays a crucial role in the regulation and development of blockchain technology. Blockchain has the potential to increase trust between contracting parties and enable secure transactions [1]. However, to fully harness the benefits of blockchain, legal frameworks need to be established. This includes defining the term "blockchain" in legislation, presuming the reliability of information stored on the blockchain, and developing regulations for its use [2]. In the context of corporate governance, blockchain can facilitate the tokenization of equity and the emergence of decentralized autonomous organizations. To address these trends, changes to corporate law are necessary [3]. Moreover, blockchain's global and transnational nature requires a new understanding of its regulation. It should be seen as an infrastructural commons, with the law playing an active role in safeguarding access and ensuring public utility safeguards [4]. While blockchain technology may not be highly regulated, its applications, such as crypto-assets, raise significant regulatory issues that governments are grappling with [5].

buat visualisasi 5 artikel paling banyak disitasi beserta tahun terbit dibandingkan dengan 5 penulis banyak disitasi

< 2/2 >

Untuk menghasilkan visualisasi yang diminta, saya akan mengambil langkah-langkah berikut:

1. **Identifikasi 5 Artikel Paling Banyak Disitasi:** Menggunakan jaringan citasi yang telah dibuat untuk menghitung jumlah citasi untuk setiap artikel dan memilih 5 artikel dengan citasi terbanyak.
2. **Identifikasi 5 Penulis Paling Banyak Disitasi:** Menggunakan informasi dari artikel paling banyak disitasi untuk menentukan 5 penulis yang karyanya paling sering dikutip.
3. **Visualisasi:** Membuat grafik batang untuk memvisualisasikan perbandingan antara 5 artikel dan 5 penulis paling banyak disitasi beserta tahun terbit artikel tersebut.

Mari kita mulai dengan identifikasi 5 artikel dan penulis paling banyak disitasi.

Finished working Show work

Berdasarkan analisis, berikut adalah 5 artikel dan penulis yang paling banyak disitasi:

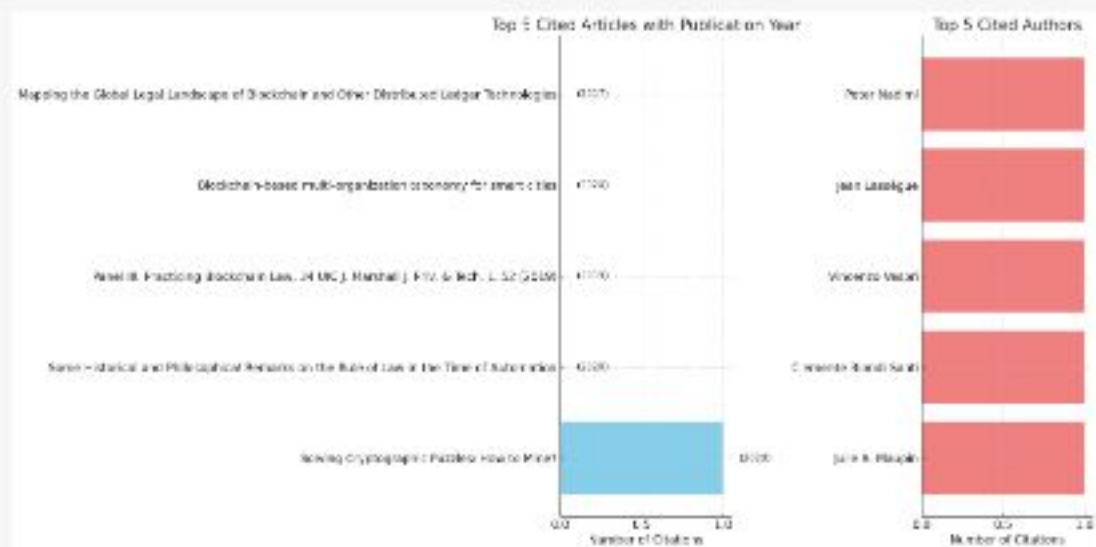

5 Artikel Paling Banyak Disitasi beserta Tahun Terbit:

1. "Solving Cryptographic Puzzles: How to Mine?" - 2020
2. "Some Historical and Philosophical Remarks on the Rule of Law in the Time of Automation" - 2020
3. "Panel III: Practicing Blockchain Law, 34 UIC J. Marshall J. Priv. & Tech. L. 52 (2019)" - 2019
4. "Blockchain-based multi-organization taxonomy for smart cities" - 2020
5. "Mapping the Global Legal Landscape of Blockchain and Other Distributed Ledger Technologies" - 2017

5 Penulis Paling Banyak Disitasi:

1. Julie A. Maupin
2. Clemente Biondi Santi
3. Vincenzo Vespri
4. Jean Lassègue
5. Peter Nadimi

Finished working Show work

Visualisasi di atas menunjukkan perbandingan antara 5 artikel dan 5 penulis paling banyak disitasi:

Sebelah Kiri: Grafik batang menunjukkan jumlah sitasi untuk 5 artikel paling banyak disitasi dengan tahun publikasi yang ditunjukkan dalam tanda kurung.

Sebelah Kanan: Grafik batang menunjukkan jumlah sitasi untuk 5 penulis paling banyak disitasi.

Literature Review on the Shortcomings of the Current Notary System

Introduction

The concept of "Protokol Notaris" is integral to the legal landscape, serving as a cornerstone for notarial practices. Recent scholarly contributions have highlighted various issues affecting the effectiveness and reliability of the current Notaris system. This literature review aims to synthesize key findings, suggesting that the current system is fraught with shortcomings that necessitate reform.

Legal Responsibilities and Failures

Firstly, the legal responsibilities of notaries in the context of Protokol Notaris have been examined by several researchers. For instance, one study delves into the legal protocols and responsibilities of notaries in maintaining the Protokol (Rivanty, 2015). While this study acknowledges the formal structures in place, it implicitly questions their adequacy

Waspada menggunakan GPT Plugin

MATT BURGESS

SECURITY 25.07.2023 12:00 PM

ChatGPT Has a Plugin Problem

Third-party plugins boost ChatGPT's capabilities. But security researchers say they add an extra layer of risk.

<https://www.wired.co.uk/article/chatgpt-plugins-security-privacy-risk>

Hati-hati

1. Jangan minta plugin untuk akses data sensitif atau drive yang berisi data sensitif.
2. Hanya gunakan plugin yang dibuat oleh developer terpercaya. Cek review policy di websitenya.
3. Waspada terhadap plugin yang menggunakan OAuth atau minta anda login dulu dengan google. atau sign up.
4. Pastikan anda tidak unggah atau menuliskan data sensitif yang bisa merugikan anda.

Standar Etika Penggunaan AI untuk Penulisan Artikel Ilmiah

AI tidak bisa diposisikan sebagai Penulis-COPE

COPE position statement

<https://publicationethics.org/cope-position-statements/ai-author>

The use of artificial intelligence (AI) tools such as ChatGPT or Large Language Models in research publications is expanding rapidly. COPE joins organisations, such as [WAME](#) and the [JAMA Network](#) among others, to state that AI tools cannot be listed as an author of a paper.

AI tools cannot meet the requirements for [authorship](#) as they cannot take responsibility for the submitted work. As non-legal entities, they cannot assert the presence or absence of conflicts of interest nor manage copyright and license agreements.

Authors who use AI tools in the writing of a manuscript, production of images or graphical elements of the paper, or in the collection and analysis of data, must be transparent in disclosing in the Materials and Methods (or similar section) of the paper how the AI tool was used and which tool was used.

Authors are fully responsible for the content of their manuscript, even those parts produced by an AI tool, and are thus liable for any breach of publication ethics.

Artificial Intelligence (AI)

1. [AI Authorship](#)
2. [Generative AI Images](#)

AI Authorship

Large Language Models (LLMs), such as ChatGPT, do not currently satisfy our [authorship](#) criteria. Notably an attribution of authorship carries with it accountability for the work, which cannot be effectively applied to LLMs. Use of an LLM should be properly documented in the Methods section (and if a Methods section is not available, in a suitable alternative part) of the manuscript.

Generative AI Images

The fast moving area of generative AI image creation has resulted in novel legal copyright and research integrity issues. As publishers, we strictly follow existing copyright law and best practices regarding publication ethics. While legal issues relating to AI-generated images and videos remain broadly unresolved, Springer Nature journals are unable to permit its use for publication.

Cambridge Publishing

AI Contributions to Research Content

- **AI use must be declared and clearly explained** in publications such as research papers, just as we expect scholars to do with other software, tools and methodologies.
- AI does not meet the Cambridge **requirements for authorship**, given the need for accountability. AI and LLM tools may not be listed as an author on any scholarly work published by Cambridge
- **Authors are accountable** for the accuracy, integrity and originality of their research papers, including for any use of AI.
- Any use of AI must not breach Cambridge's **plagiarism policy**. Scholarly works must be the author's own, and not present others' ideas, data, words or other material without adequate citation and transparent referencing.

Elsevier Policy

DO	DO NOT
<ul style="list-style-type: none">● Declare assisted by AI● Add in method if use AI to analyze data● Add Declaration of Generative AI and AI-assisted technologies (above reference section)● Minor edits for clarity allowed; unethical manipulations prohibited● Disclose AI tool use in manuscript; usual copyright processes apply.	<ul style="list-style-type: none">● Add AI as Author● Enhance, obscure, move, remove, or introduce a specific feature within an image.

<https://www.elsevier.com/about/policies/publishing-ethics/the-use-of-ai-and-ai-assisted-writing-technologies-in-scientific-writing>

Declaration of Generative AI and AI-assisted technologies:

“During the preparation of this work the author(s) used [NAME TOOL / SERVICE] in order to [REASON]. After using this tool/service, the author(s) reviewed and edited the content as needed and take(s) full responsibility for the content of the publication.”

Perhatikan

<https://www.elsevier.com/about/policies/publishing-ethics/the-use-of-ai-and-ai-assisted-writing-technologies-in-scientific-writing>

Why has Elsevier decided that AI and AI-assisted tools cannot be credited as an author on published work? 

Authorship implies responsibilities and tasks that can only be attributed to and performed by humans. Each (co-) author is accountable for ensuring that questions related to the accuracy or integrity of any part of the work are appropriately investigated and resolved and authorship requires the ability to approve the final version of the work and agree to its submission. Authors are also responsible for ensuring that the work is original, that the stated authors qualify for authorship, and the work does not infringe third party rights.

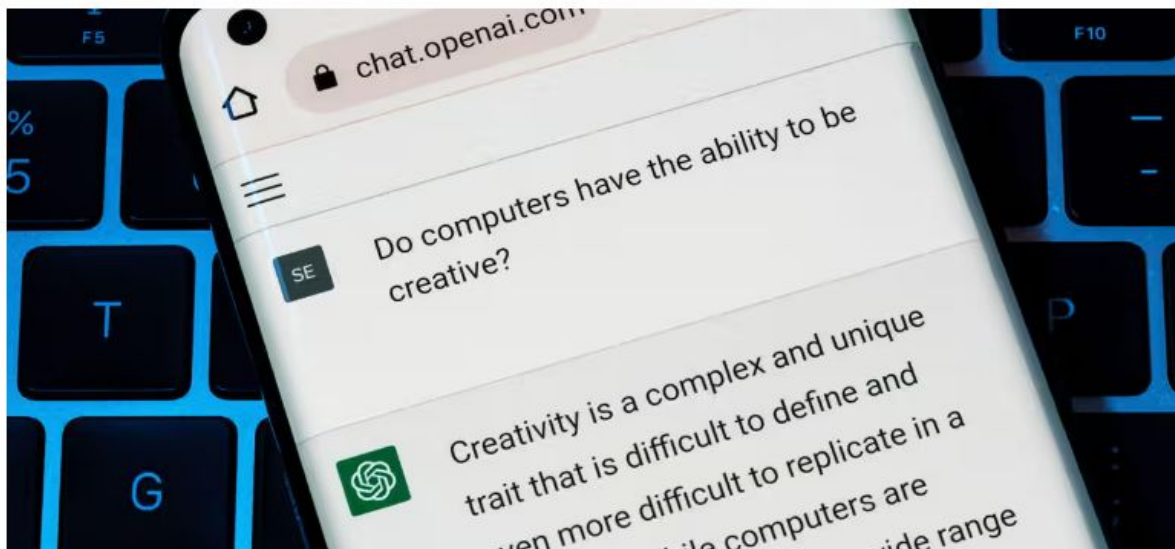

AI dan Plagiarisme = Algiarism ???

What to do when you're accused of AI cheating

AI detectors like Turnitin and GPTZero suffer from false positives that can accuse innocent students of cheating. Here's the advice of academics, AI scientists and students on how to deal with it.

Analysis by Geoffrey A. Fowler
