INTRODUCTION:

Today, learning foreign languages has become the need of the hour. Our country to independence since the achievement, the demand for learning foreign languages has increased rather than decreased. In Uzbekistan, the Internet is highly developed, so that it is possible for language learners to use it can use all necessary facilities. Currently, all schools, colleges, Lyceums and higher educations have modern computers that can be used by any user have internet access. Modern technologies in learning foreign languages the main purpose of learning is to help the organization of the language without difficulty. The most common method of modern approaches is mainly multimedia in the lesson is to use. The advantage of multimedia tools is vivid in learning a foreign language learning by looking at games, pictures, listening to sounds, and observing the activity of live games possible. This is one of the main requirements for teaching foreign languages using Internet resources is to create interaction in the lesson, which is usually called interactivity in the methodology. Interactivity is "combining, coordinating, and complementing communicative goals and resulting efforts by means of speech." By teaching the real language the Internet helps to build speaking skills and abilities, as well sincere interest in teaching vocabulary and grammar and therefore efficiency provides. Interactivity not only creates real life situations, but also forces students to give appropriate answers to them in a foreign language. The role of technology in language learning is demonstrated by:

1. Language learning programs:

Applications such as Duolingo, Memrise, Babbel provide an interactive and game-based language learning experience. The learning process will be pleasant and effective. An opportunity to learn at any convenient time and place is created.

2. Online resources:

Platforms like YouTube, Khan Academy, Coursera offer video lessons, study materials and tests. An opportunity to get acquainted with the styles and presentations of different teachers. Online dictionaries and grammar resources support the learning process.

3. Language exchange programs:

Apps like Tandem connect language learners with native speakers. Practice language learning and improve speaking skills. Opportunity to get acquainted with the culture of another country.

LITERATURE REVIEW AND METHODOLOGY:

Nowadays, many conditions have been created for learning foreign languages. Especially there are many ways to learn online. To organize these foreign languages various sites on the internet will help you closely. For example, it is useful in learning English

Sites that are:

List-english.ru - various materials for learning English: online dictionaries, schools, forums, translators, tutors, tests, school textbooks, video courses, games, Android Apps, iPhone, YouTube channels, podcasts, and more. Everything is free.

Englishtips.org - Downloadable textbooks and books. The search engine is good Works. You can find many things related to language learning. Britishcouncil.org is the website of the British Council. Tests, grammar, games and others. Everything is in English, so it's a bit much for those new to the language it will be difficult to navigate, but knowledge will be strengthened through this. Real-english.com is a site full of lessons, articles and videos. Eslpod.com - its main mission is to teach English as a second language.

Advantages of technology:

Ease and Convenience: You can learn anytime and anywhere. Affordability: Many apps and resources are available for free or at low cost. Efficiency: With the help of games, interactive exercises and technology, language can be learned quickly and efficiently. Personalization: Many apps and resources provide curriculum tailored to the needs of the learner.

Things to consider when using technology:

Student motivation is important. Technology by itself does not guarantee language learning. Real communication is also important. Technology is only an additional tool, and language exchange with real people is also necessary. You should not be completely dependent on technology. You can also get information about the language you are learning from books, magazines, and other resources.

DISCUSSION:

Foreign language using technological tools every aspect of learning, reading, writing, listening, and speaking, comes into play. For example, to listen and understand this process, of course, without a

computer, player, or CD Cannot be done. Listening comprehension is one of the most important parts of language learning is one. At the same time, the reader learns the speaker's pronunciation and grammatical rules it is required to pay attention to its compliance, vocabulary and its meanings. Education in the process of using modern technologies, students also have information - good knowledge of communication technologies and the ability to use them is an important factor is considered Teaching and learning a foreign language using modern technologies is the best is one of the best methods.

Foreign language courses at school and college are among other educational subjects taught in them fundamentally different in essence. The concept of "foreign language" can be interpreted as follows: "learning a foreign language" is a methodical term in this language the meaning of acquiring speaking, listening, reading and writing skills and competencies represents in recent years, the interaction of people with the help of information communication technologies it is observed that personal and professional communication is active. For a long time writing had become important only as a means of teaching a foreign language. But effective use of various forms of official and personal correspondence in modern times the need is evident. Therefore, students studying Turkish formation of written speech is also important.

RESULTS:

Only when new ideas and technologies are used in teaching English can progress be achieved. If they are applied in the process of classes, they will undoubtedly be effective. The purpose of using additional text teaching technology is to familiarize students with the most general ideas in education. This technology reflects a person-oriented approach, productive and positive results can be achieved only when each student not only acquires knowledge, skills and abilities, but also takes into account his individual development characteristics.

Children like to watch cartoons on TV. If we took a cartoon that they often watch, translated it into another foreign language, for example, English, and showed it to them, it would be easier for children to memorize and remember words. At first, they would talk about themselves, then about others and about various events in their lives. In addition, children can also learn a foreign language by watching various cartoons and short videos on YouTube. The demand for learning a foreign language is also increasing day by day. Foreign language is divided into four aspects: reading, writing, listening comprehension and speaking, and separate concepts and skills are provided for each of them. Educational technologies are the effective use of modern information technologies in the educational process. They also involve increasing the quality and efficiency of education by introducing modern innovative technologies into the educational process. In particular, there are several advantages of using such information and communication technologies in learning a foreign language. The role of modern technology in language learning and teaching is incomparable.

CONCLUSION:

In conclusion, any kind of language learning technology has and will continue to have its place as well. Years no matter how much the world of technology develops, the language of people There are stages in learning that technology cannot handle. From this, apparently, it is known to use technology or any application learning a language according to rules and laws or in a certain regime the level and quality of the language of people will increase all over the world learning problems will be somewhat reduced.
