Menemukan Jurnal Tujuan

Berbagi, Giatkan Publikasi

- Menggunakan tools pencari jurnal otomatis atau
 - Mencari jurnal secara manual dengan memanfaatkan mesin Index dan Ranking.

Kemudian melakukan filter berbasis
<http://www.thinkchecksubmit.org>

CHECK

- Do you or your colleagues know the journal?
- Have you read any articles in the journal before?
- Is it easy to discover the latest papers in the journal?
- Is the publisher name clearly displayed on the journal website?
- Can you contact the publisher by telephone, email, and post?
- Is the journal clear about the type of peer review it uses?

CHECK (cont)

- Are articles indexed in services that you use?
- Does the journal site explain what these fees are for and when they will be charged?
- Do you recognise the editorial board?
- Do the editorial board (team) mention the journal on their own websites?
- Is the publisher a member of a recognized industry initiative?
 1. [Committee on Publication Ethics \(COPE\)](#) ?
 2. [Directory of Open Access Journals \(DOAJ\)](#) ?
 3. [Open Access Scholarly Publishers' Association \(OASPA\)](#) ?

SPRINGER NATURE | Find the right journal

Personalized recommendation

Our journal matching technology finds relevant journals based on your manuscript details

Over 2,500 journals

Search all Springer and BioMed Central journals to find the most suitable journal for your manuscript

Author choice

Easily compare relevant journals to find the best place for publication

Enter your manuscript details to see a list of journals most suitable for your research.

Find journals Find authors Find articles

Welcome to Jane

Have you recently written a paper, but you're not sure to which journal you should submit it? Or maybe you want to find relevant articles to cite in your paper? Or are you an editor, and do you need to find reviewers for a particular paper? Jane can help!

Just enter the title and/or abstract of the paper in the box, and click on 'Find journals', 'Find authors' or 'Find Articles'. Jane will then compare your document to millions of documents in PubMed to find the best matching journals, authors or articles.

Keyword search

Instead of using a title or abstract, you can also search using a keyword search, similar to popular web search engines. Click [here](#) to search using keywords.

Beware of predatory journals

JANE relies on the data in PubMed, which can contain papers from predatory journals, and therefore these journals can appear in JANE's results. To help identify high-quality journals, JANE now tags journals that are currently indexed in MEDLINE, and open access journals approved by the Directory of Open Access

Manfaat penelusuran artikel

1. State of the Art (membandingkan dengan karya ilmuwan terdahulu yang membahas terkait dengan tema atau metode penelitian)
2. Pemanfaatan metode penulis lain
3. Pemanfaatan teori untuk menemukan hasil.
4. Membandingkan dengan temuan penulis lain.
5. Menemukan jurnal tujuan.

2 Ways to Tracking Fulltext Article

1. Use open access index
2. Use general or special index and abstract service to search your article.
 - Narrow down only open access article

Open Access Index

- <https://doaj.org/>
- <https://www.openaire.eu/search>
- <https://core.ac.uk/search/>
- <http://www.springeropen.com/journals>
- <http://id.portalgaruda.org>

General Index and Abstract

- <http://scholar.google.com>
- <http://www.sciencedirect.com>
- <http://online.sagepub.com/search>
- <https://www.scopus.com>
- <http://onesearch.id/Search>
- <http://search.crossref.org>
- <http://id.portalgaruda.org>
- <https://www.base-search.net/>
- <http://ristekdikti.summon.serialssolutions.com/#!/>
- <http://e-resources.perpusnas.go.id>

Mendapatkan artikel ilmiah berbayar.

1. Gunakan <https://scholar.google.co.id> dengan menambahkan pdf setelah judul (berikan tanda kutip pada judul/kata kunci) eg. “pembelajaran kognitif” pdf
2. Jika gagal, gunakan Tools Pencari Artikel Gratis
3. Jika gagal, email penulisnya
4. Jika gagal (tidak dibalas dst). Kontak kampus dari penulisnya (yang afiliasinya tertera di Artikel. Mungkin mereka punya salinan artikel tersebut.

Google scholar searching technique

1. Go to <https://scholar.google.com>
2. Activate bibtex button in setting option
3. Find word or phrase with relative keywords. ("notaris pasar modal" indonesia | Jawa timur)
4. Find intitle ("notaris pasar modal" intitle:bursa efek)
5. Find keyword or title with exclude (pasar modal -bursa efek) or ("pasar modal" -bursa efek)
6. Find title with author ("Notary" author:multazam)
7. Find title with filetype ("Notary" filetype:pdf)
8. Find word or concept meaning (Define:notary)
9. Use advanced Scholar Search. By clicking narrow button on "search" column

Search methods

<http://libguides.library.uu.nl/>

- **Snowball method:** search based on the features (author, references, citations, keywords etc.) of an earlier found publication. Usually simply by following the links in a search engine or literature database. **Citation searching** is a special kind of snowball searching in which you follow citation links. You will find more recent literature.
- **Systematic method:** entering search terms you thought of yourself in search engines that make literature in a particular discipline (or any discipline) searchable, regardless of availability
- **Catalogue method:** entering search terms you thought of yourself in search engines that make literature in a particular (print or electronic) collection searchable

Search techniques

- **Boolean search:** combining and excluding with AND, OR, NOT, NEAR
- **Exact phrase:** search by an exact combination of words, often by using double quotes e.g. "climate change"
- **Truncation:** searching by the root that a group of words has in common, often by using an asterisk e.g. *migrat** for migration, migrated, migratory etc. (not supported by Google)
- **Masking** tell the search engine that one or more characters you are not sure about are not necessary for your search
- **Using keywords** generated by the authors or by the makers of a search engine
- **Using thesauruses:** (subject related) overviews showing the relation between professional terms
- **Field specific search:** indicate that your terms must occur in a particular part of the publication (title, summary, name of the author). Use 'advanced search' option.
- **Using filters and 'limits':** limit your set of results by excluding publications having certain features (for instance filter on language or publication year)

Execution of your search

- Start with broad or narrow terms and either zoom in or zoom out
- Switch to and fro between your search terms and your search results to improve them
- Not enough results? > Enter fewer and broader terms, use truncation, OR instead of AND, use other source
- Too many results? > Enter more and more specific terms, exact phrase, AND instead of OR, filter (by year for instance)
